1.3 Template

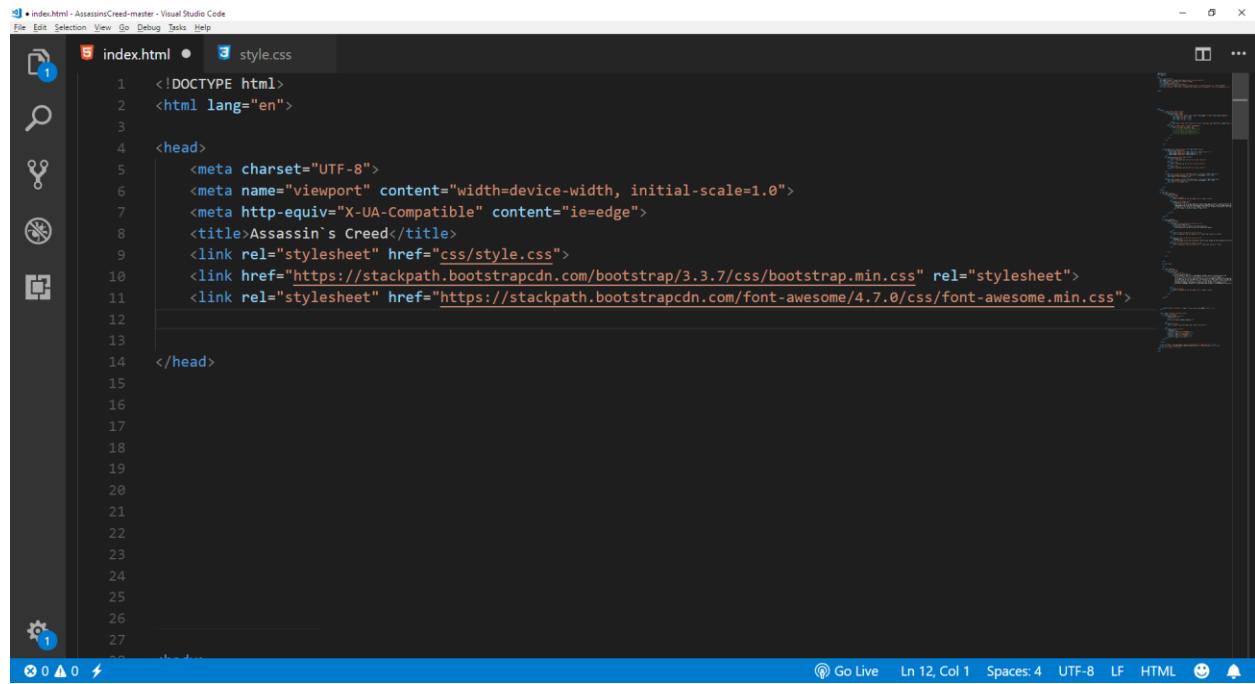

A new story and time

are introduced in each entry, and gameplay elements evolve from the previous one. There are three story arcs in the series. For the first five main games, the framing story is set in 2012 and features series protagonist Desmond Miles who uses a machine called the Animus and relives the memories of his ancestors to find a way to avert the 2012 apocalypse. In games till Assassin's Creed Syndicate Abstergo employees and Assassins initiates recorded genetic memories using the Helix software, helping the Templars and Assassins find new Pieces of Eden in the modern world. The latest two games, Assassin's Creed Origins and Assassin's Creed Odyssey follow ex-Abstergo employee Layla Hassan as she is recruited into the Assassins' Creed.

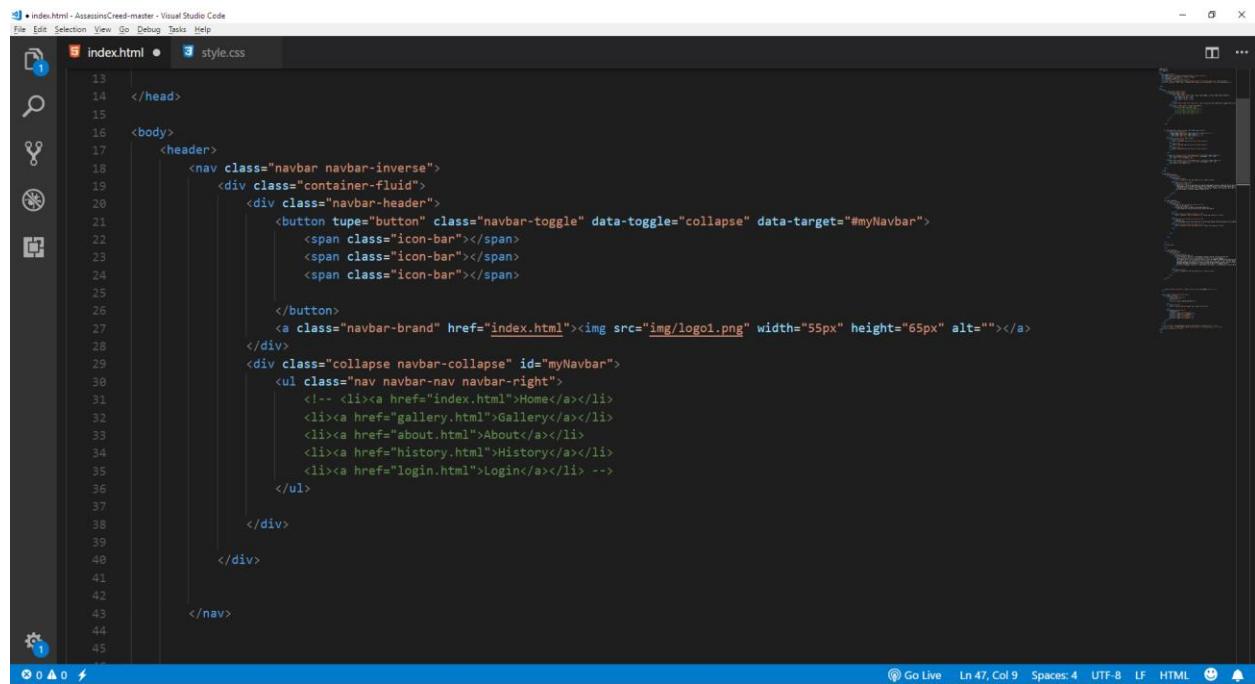

1.3.1 index.html

The screenshot shows the Visual Studio Code interface with the file 'index.html' open. The code contains the head section of an HTML document, including meta tags for charset, viewport, and X-UA-Compatible, a title 'Assassin's Creed', and links to external CSS files for Bootstrap and Font Awesome.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <meta http-equiv="X-UA-Compatible" content="ie=edge">
    <title>Assassin's Creed</title>
    <link rel="stylesheet" href="css/style.css">
    <link href="https://stackpath.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css" rel="stylesheet">
    <link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome.min.css">
</head>
```

The screenshot shows the Visual Studio Code interface with the file 'index.html' open. The code now includes the body section with a header containing a navbar. The navbar features a brand logo, a collapse button, and a navigation menu with links to Home, Gallery, About, History, and Login.

```
</head>
<body>
    <header>
        <nav class="navbar navbar-inverse">
            <div class="container-fluid">
                <div class="navbar-header">
                    <button type="button" class="navbar-toggle" data-toggle="collapse" data-target="#myNavbar">
                        <span class="icon-bar"></span>
                        <span class="icon-bar"></span>
                        <span class="icon-bar"></span>
                    </button>
                    <a class="navbar-brand" href="index.html"></a>
                </div>
                <div class="collapse navbar-collapse" id="myNavbar">
                    <ul class="nav navbar-nav navbar-right">
                        <li><a href="index.html">Home</a></li>

1.3.2 register.html

The screenshot shows the Visual Studio Code interface with the "register.html" file open. The code editor displays the following HTML:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <meta http-equiv="X-UA-Compatible" content="ie=edge">
    <title>Assassin's creed</title>
    <link rel="stylesheet" href="css/style.css">
    <link href="https://stackpath.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css" rel="stylesheet">
    <link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome.min.css">
</head>
<body>
```

The status bar at the bottom of the code editor shows "Port : 5500" and other details.

```

16      <h3>About</h3>
17      <p>Assassin's Creed is a series of action-adventure video games developed by Ubisoft. It follows the story of Altair Ibn La'Ahad, a member of the Assassin's Brotherhood, as he travels across the Middle East and Europe to uncover the secrets of the Templars. The game features a mix of stealth, combat, and exploration, set against a backdrop of historical landmarks and architecture. The series has sold millions of copies worldwide and is considered one of the most successful franchises in gaming history.</p>

Assassin's Creed

is an action-adventure stealth video game franchise created by Patrice Désilets, Jade Raymond and Corey May, developed and published by Ubisoft using the game engine Anvil Next. It depicts in the centuries-old struggle, now and then, between the Assassins, who fight for peace with free will, and the Templars, who desire peace through control.

The series features

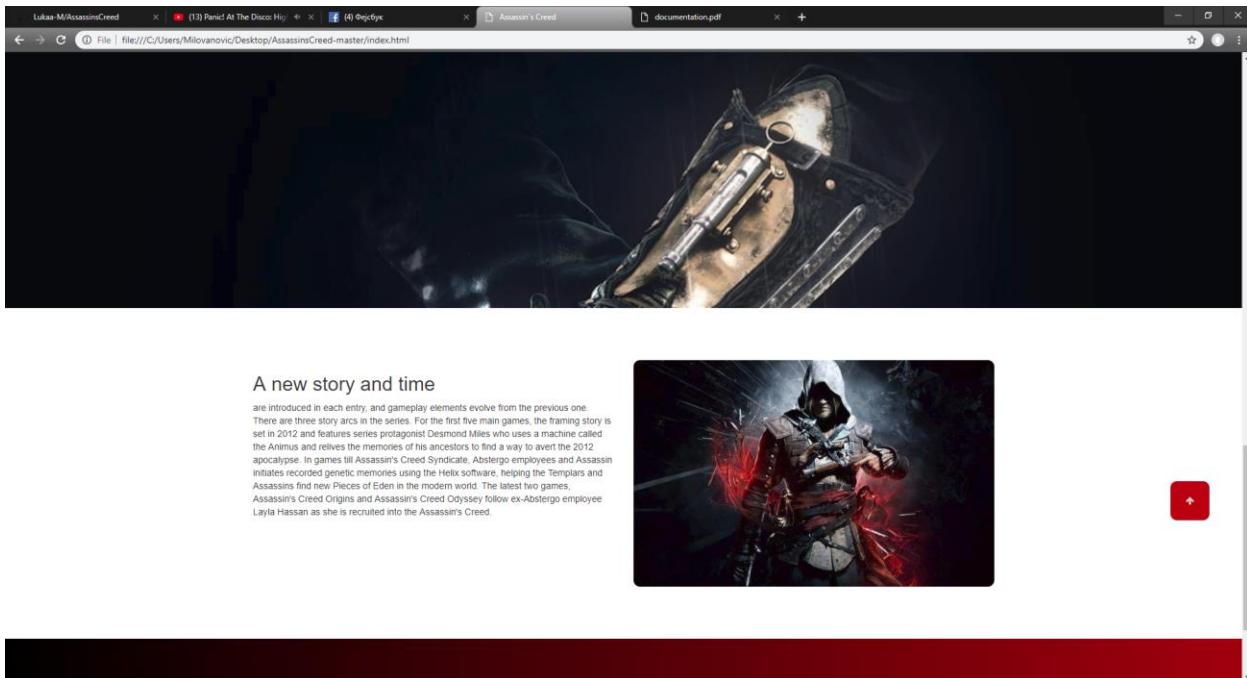

historical fiction, science fiction and characters, intertwined with real-world historical events and figures.

Alamut

The video game series took inspiration from the novel Alamut by the Slovenian writer Vladimir Bartol.

A new story and time

are introduced in each entry, and gameplay elements evolve from the previous one. There are three story arcs in the series. For the first five main games, the framing story is set in 2012 and features series protagonist Desmond Miles who uses a machine called the Animus and relives the memories of his ancestors to find a way to avert the 2012 apocalypse. In games till Assassin's Creed Syndicate, Abstergo employees and Assassin initiates recorded genetic memories using the Helix software, helping the Templars and Assassins find new Pieces of Eden in the modern world. The latest two games, Assassin's Creed Origins and Assassin's Creed Odyssey follow ex-Abstergo employee Layla Hassan as she is recruited into the Assassin's Creed.

Main.js | Jquery

The screenshot shows the Visual Studio Code interface with the main.js file open in the central editor area. The file contains Jquery code for rendering a navbar and validating form inputs. The code includes logic for handling login forms, email validation, and password strength checks. The VS Code interface includes the Explorer sidebar on the left showing project files like gallery.html, style.css, and other js files, and a status bar at the bottom indicating the port is 5500.

```
$document.ready(function() {
    const navbarElements = [
        {
            path: "index.html",
            name: "Home"
        },
        {
            path: "gallery.html",
            name: "Gallery"
        },
        {
            path: "about.html",
            name: "About"
        },
        {
            path: "history.html",
            name: "History"
        },
        {
            path: "login.html",
            name: "Login"
        },
        {
            path: "register.html",
            name: "Register"
        }
    ];
    renderNavbar(
        navbarElements,
        document.querySelector(".nav.navbar.navbar-right")
    );
    var form = document.getElementById("login-form");
    if (form) {
        form.addEventListener("submit", function(e) {
            e.preventDefault();
            const validator = new Validator();
            validator.validateEmail(
                this.email.value,
                "Your email is not valid",
                ".error-email"
            );
            validator.validatePassword(
                this.password.value,
                "Your password must contain... ",
                ".error-password"
            );
            if (validator.hasErrors()) {
                validateInputs();
            }
        });
    }
});
```

This screenshot shows the same Visual Studio Code session with the main.js file open. A new section of code has been added at the bottom to handle scroll-to-top functionality. It uses jQuery to detect scroll events and fade in/fade out a "#scrollToTop" button based on the scroll position. The code also includes a renderNavbar function and a Validator class definition. The status bar at the bottom shows the port is 5500.

```
if (validator.hasErrors()) {
    validator.render();
    return;
}
$("#alert.alert-success").removeClass("none");
setTimeout(function() {}, 5000);
});
}

$(window).scroll(function(){
    if($("#this").scrollTop() > 800){
        $("#scrollToTop").fadeIn();
    } else{
        $("#scrollToTop").fadeOut();
    }
});

$("#scrollToTop").click(function(){
    $("html,body").animate({scrollTop: 0}, 1500);
});

function renderNavbar(elements, navbar) {
    if (navbar === null) {
        return;
    }
    navbar.innerHTML = elements.map(function(item) {
        return `<li><a href="#${item.path}">${item.name}</a></li>`;
    });
}

function Validator() {
    this.errors = [];
}

Validator.prototype.validateEmail = function(value, message, element) {
    const emailRegex = /^[a-zA-Z0-9\.\_]+@[a-zA-Z0-9\.\_]+\@[a-zA-Z]{2,}\.\w{2,}\$/;
    if (!this.validate(emailRegex, value)) {
        this.pushError(message, element);
        return false;
    }
}
```
